

Liberating Textual Data: Presidential Documents

Pooja Doctor, Avi Rabin

Bryant Le, Jimmy Nguyen

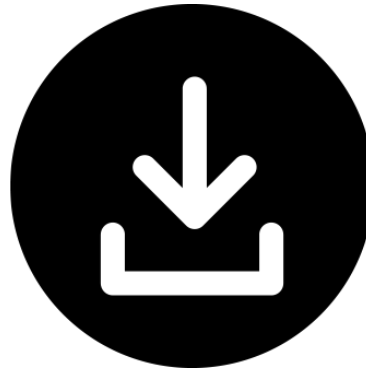

Problem

Researchers need a way to quickly get access to the documents they need, but it is difficult to do so.

The Needs

A Web Application that
allows researchers to
query the documents
they need
And do textual
analysis with the
documents.

High Level Overview

Scraper

Difficulties

Examples of analyses

Future Iterations

- Search by more than one category
- Faster, smoother loading, one-click graphs
- Prettier UI
- String matching in searches...

Summary & Conclusion
